

Advancing Sustainability

We have a responsibility to protect and enrich our planet together with our customers, suppliers and communities. It is a core part of our business and we embed sustainability and ethical practices into all that we do, being accountable for our actions while driving improvements wherever and whenever possible.

- We accelerate the circular economy
- We protect our planet, and collaborate with our customers and partners to do the same
- We champion the many people who build our products

Advancing Sustainability Goals

- We will reduce Scopes 1 and 2 greenhouse gas emissions by 50% by 2030
- We will source 75% of electricity from renewable sources across all Dell facilities by 2030 — and 100% by 2040
- We will reduce the energy intensity of our entire product portfolio by 80% (2011–2020)
- We will partner with our direct material suppliers to meet a science-based greenhouse gas emissions reduction target of 60% per unit revenue by 2030
- We will drive sustainability improvements in our global workplaces through 2030
- Each year through 2030, we will show continued commitments to provide healthy work environments where people can thrive
- Each year through 2030, we will deliver future-ready skills development for workers in our supply chain
- Each year through 2030, we will continue engagement with the people who make our products

MOONSHOT GOAL

By 2030, for every product a customer buys, we will reuse or recycle an equivalent product. 100% of our packaging will be made from recycled or renewable material. More than half of our product content will be made from recycled or renewable material.

Product Design

Since 2012, more than 100 million lbs. (45 million kg) of sustainable materials have been used in our products.

Reuse & Recycling

Since 2007, we have recovered more than 2 billion lbs. (907 million kg) of used electronics.

Packaging

Today, roughly 85% of our packaging materials are made from recycled or renewable content.
