Advancing Sustainability

We have a responsibility to protect and enrich our planet together with our customers, suppliers and communities. It is a core part of our business and we embed sustainability and ethical practices into all that we do, being accountable for our actions while driving improvements wherever and whenever possible.
- **We accelerate the circular economy**
- **We protect our planet, and collaborate with our customers and partners to do the same**
- **We champion the many people who build our products**

Advancing Sustainability Goals

- We will reduce Scopes 1 and 2 greenhouse gas emissions by 50% by 2030

- We will source 75% of electricity from renewable sources across all Dell Technologies facilities by 2030 — and 100% by 2040

- We will reduce the energy intensity of our entire product portfolio by 80% (FY12-FY21)

- We will partner with our direct material suppliers to meet a science-based greenhouse gas emissions reduction target of 60% per unit revenue by 2030

- We will drive sustainability improvements in our global workplaces through 2030

- Each year through 2030, we will show continued commitments to provide healthy work environments where people can thrive

- Each year through 2030, we will deliver future-ready skills development for workers in our supply chain

- Each year through 2030, we will continue engagement with the people who make our products

MOONSHOT GOAL

By 2030, for every product a customer buys, we will reuse or recycle an equivalent product. 100% of our packaging will be made from recycled or renewable material. More than half of our product content will be made from recycled or renewable material.

Innovative Design
Our designers start with the end in mind, making products easy to use, easy to repair and easy to recycle when done.

ACCELERATING CIRCULARITY

Reuse & Recycling
Extending lifetimes and recovering materials at end of life fuels the circular economy.

Sustainable Materials
Using recycled/renewable materials in products and packaging keeps those materials circulating in the economy.
